

Amber Wharf plans

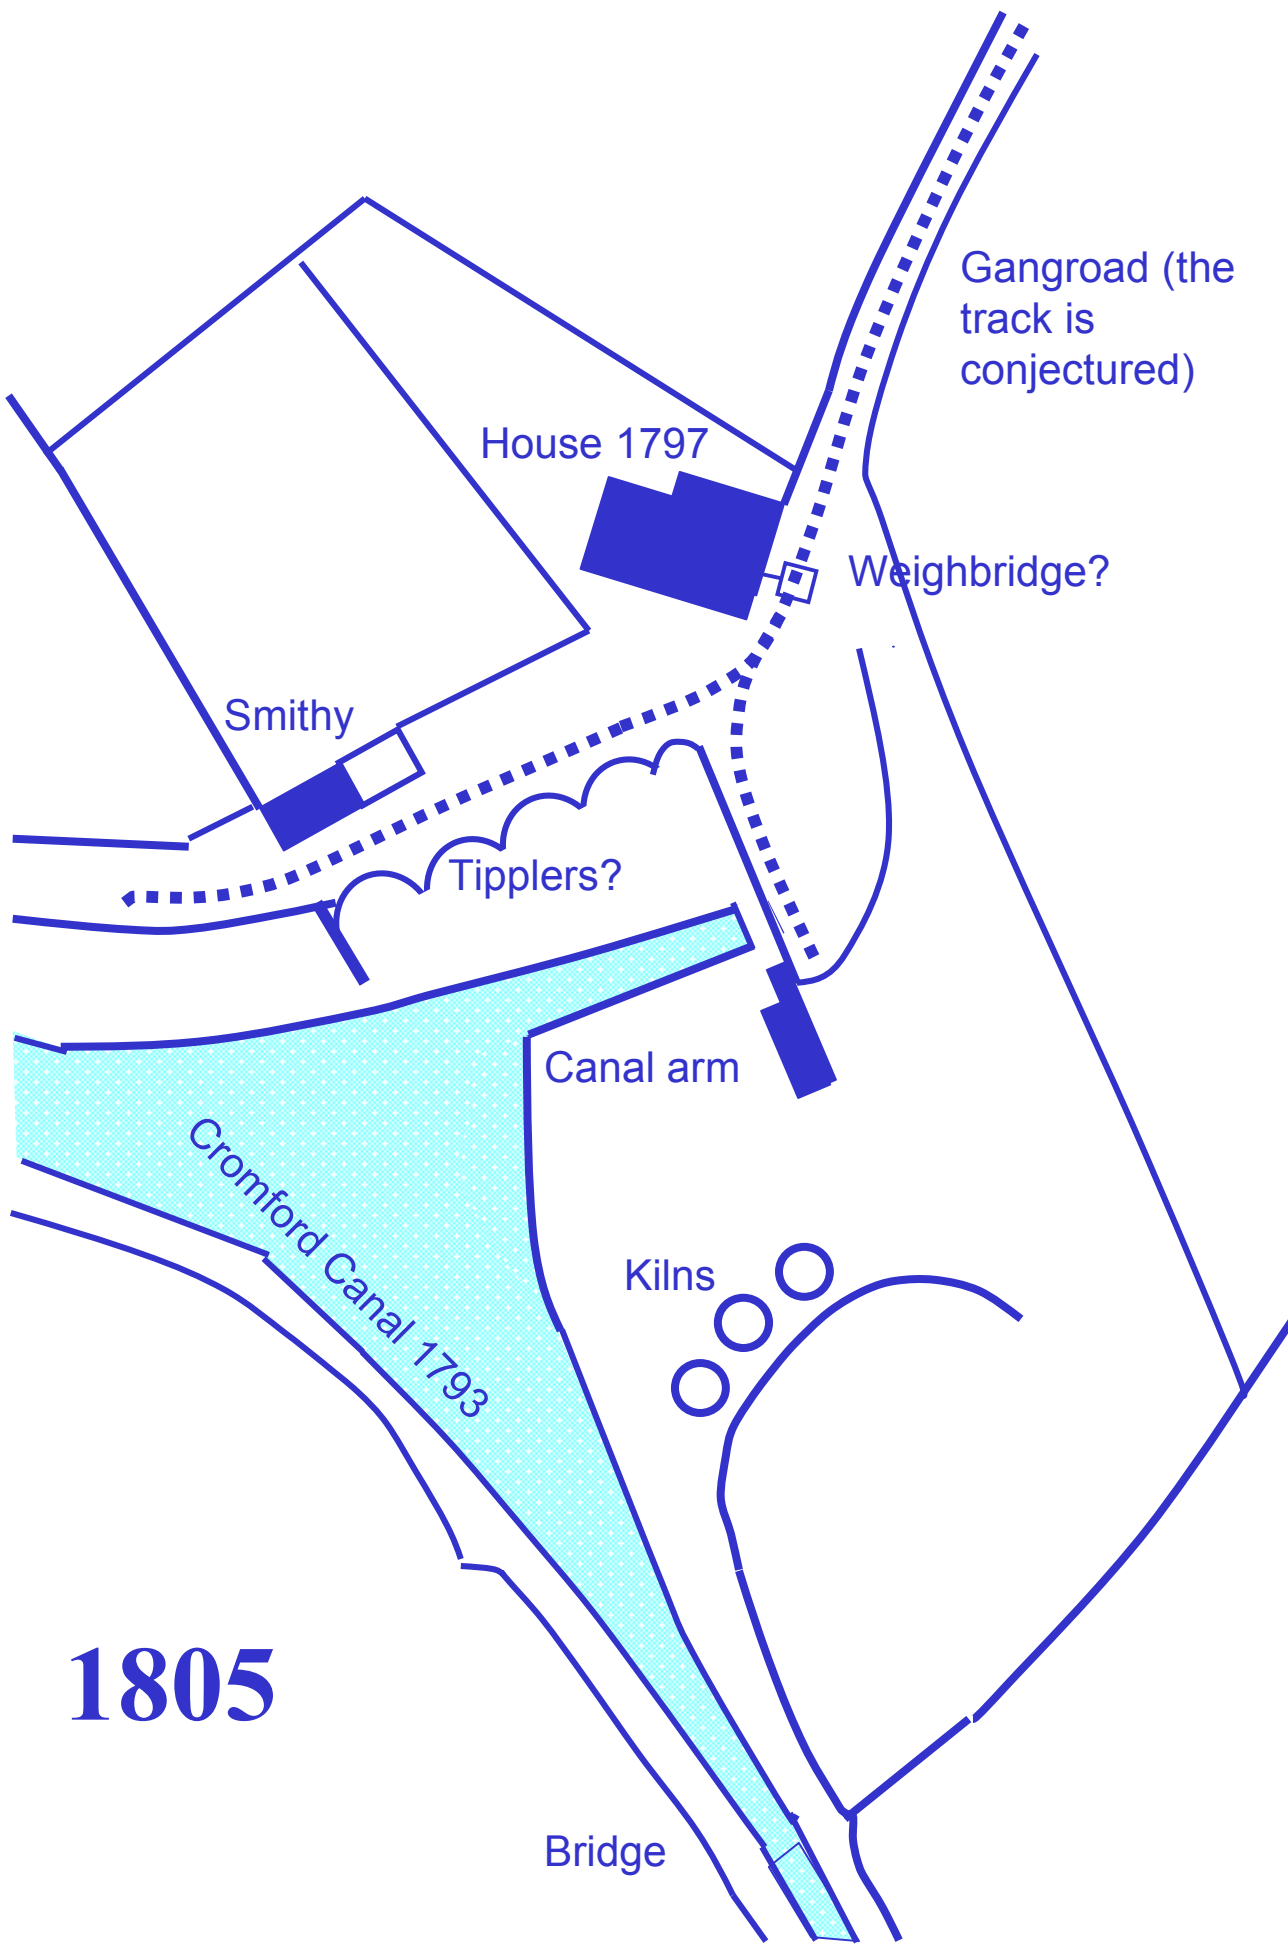

This series of plans, which are not to scale, has been produced in order to analysis how the Amber Wharf site developed and where previous features were located in relation to what exists now.

The plans are based on the available mapping information from 1805 (which did not show the whole area), 1849, 1880, 1900 and 1916. In addition a plan has been created of the area as it exists now.

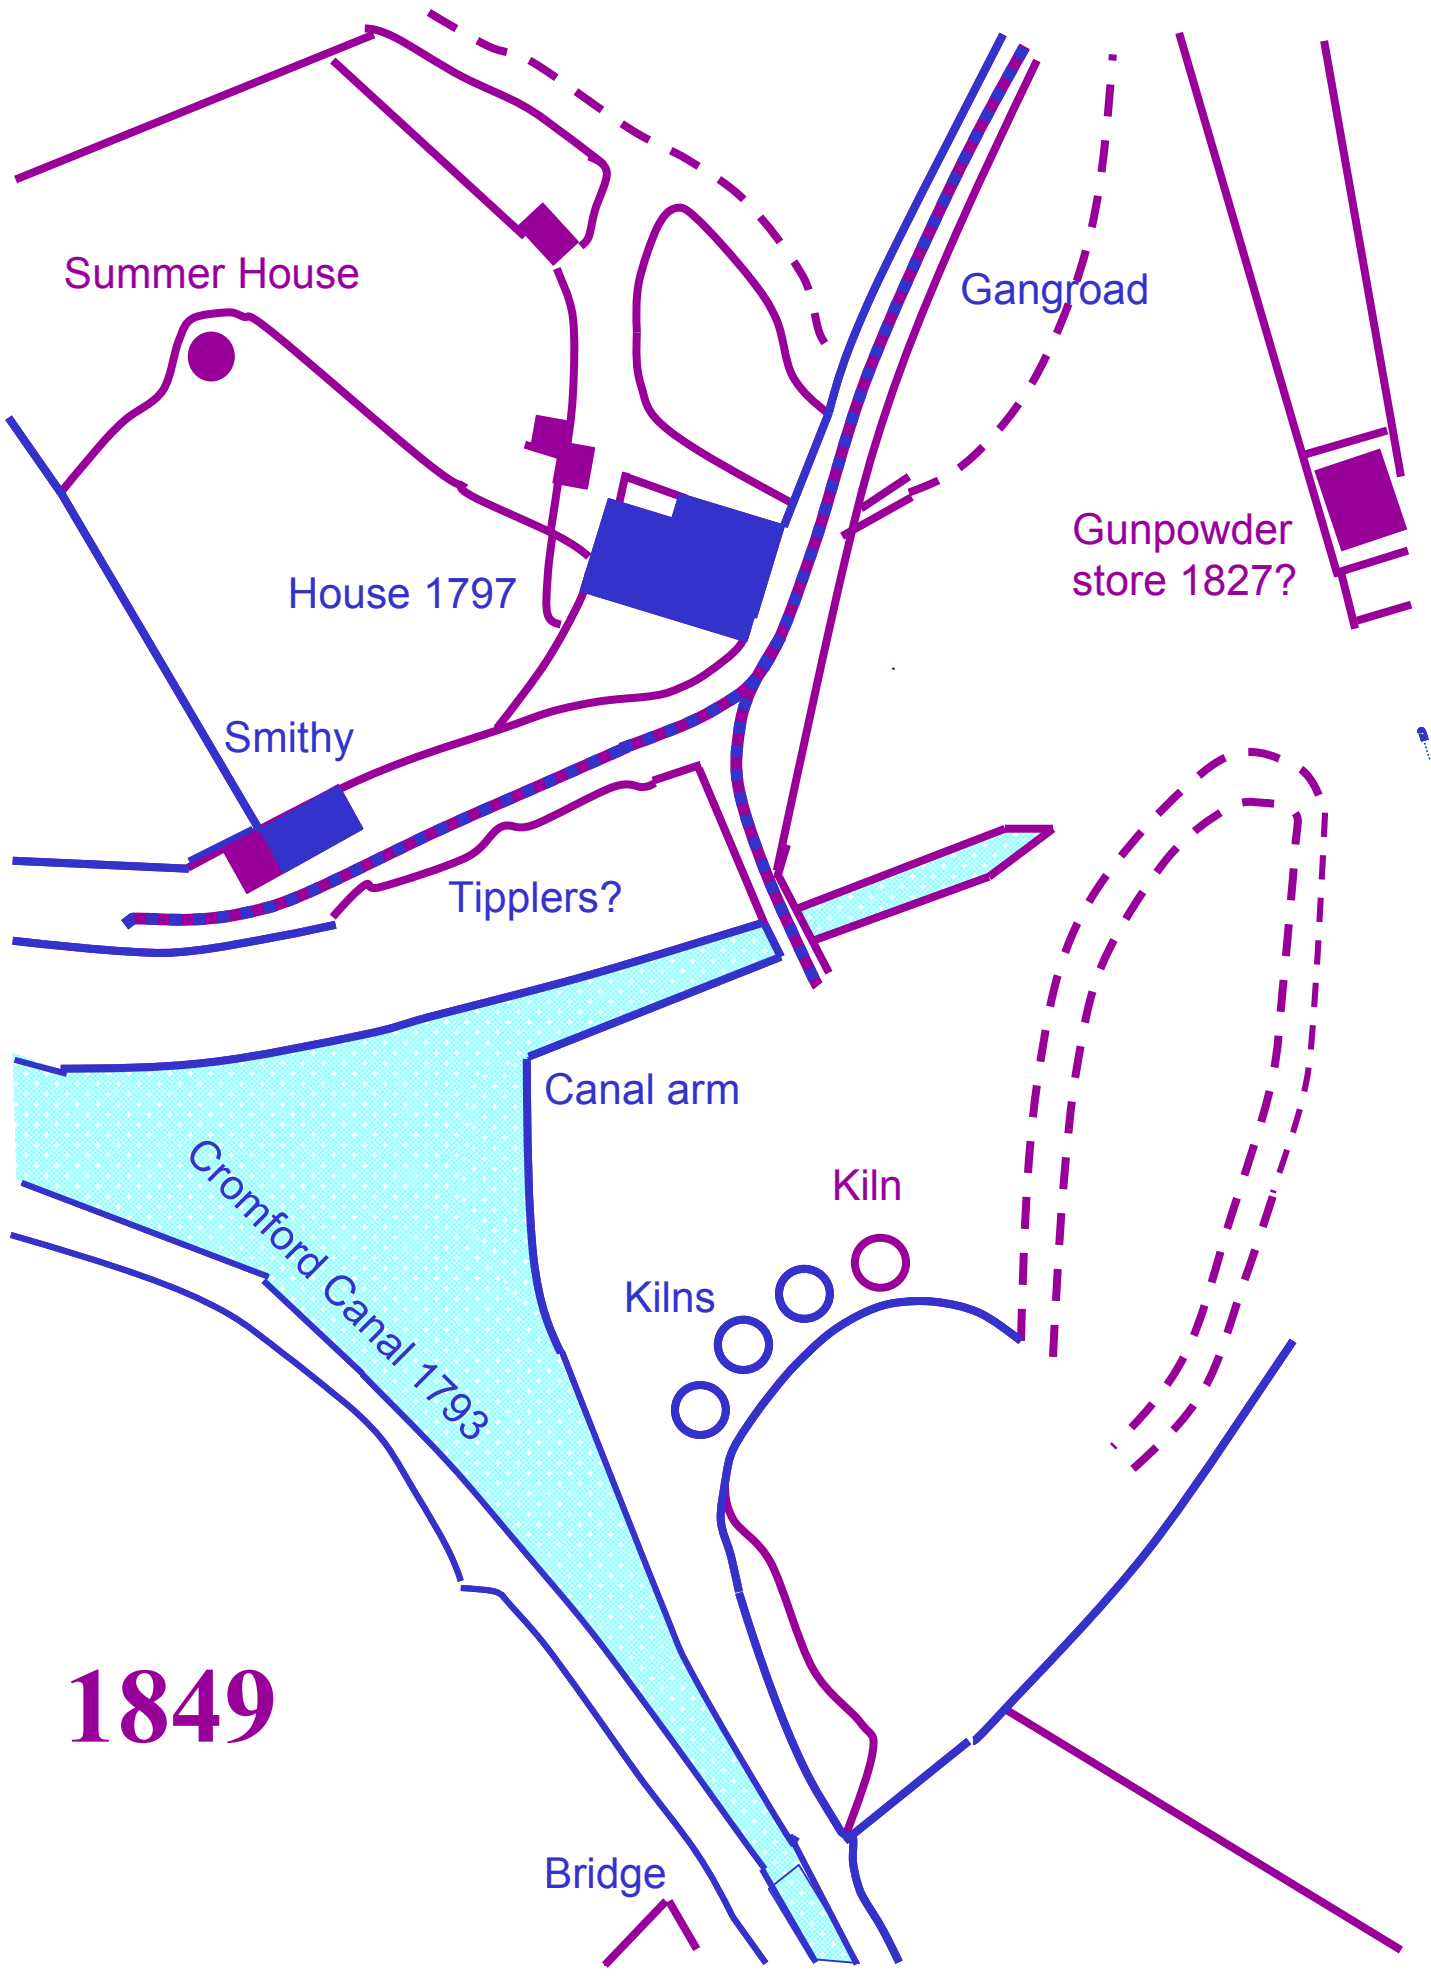

Each plan is shown in a different colour so features from earlier plans are identified by these colours in later ones. In this way you can see how the site developed.

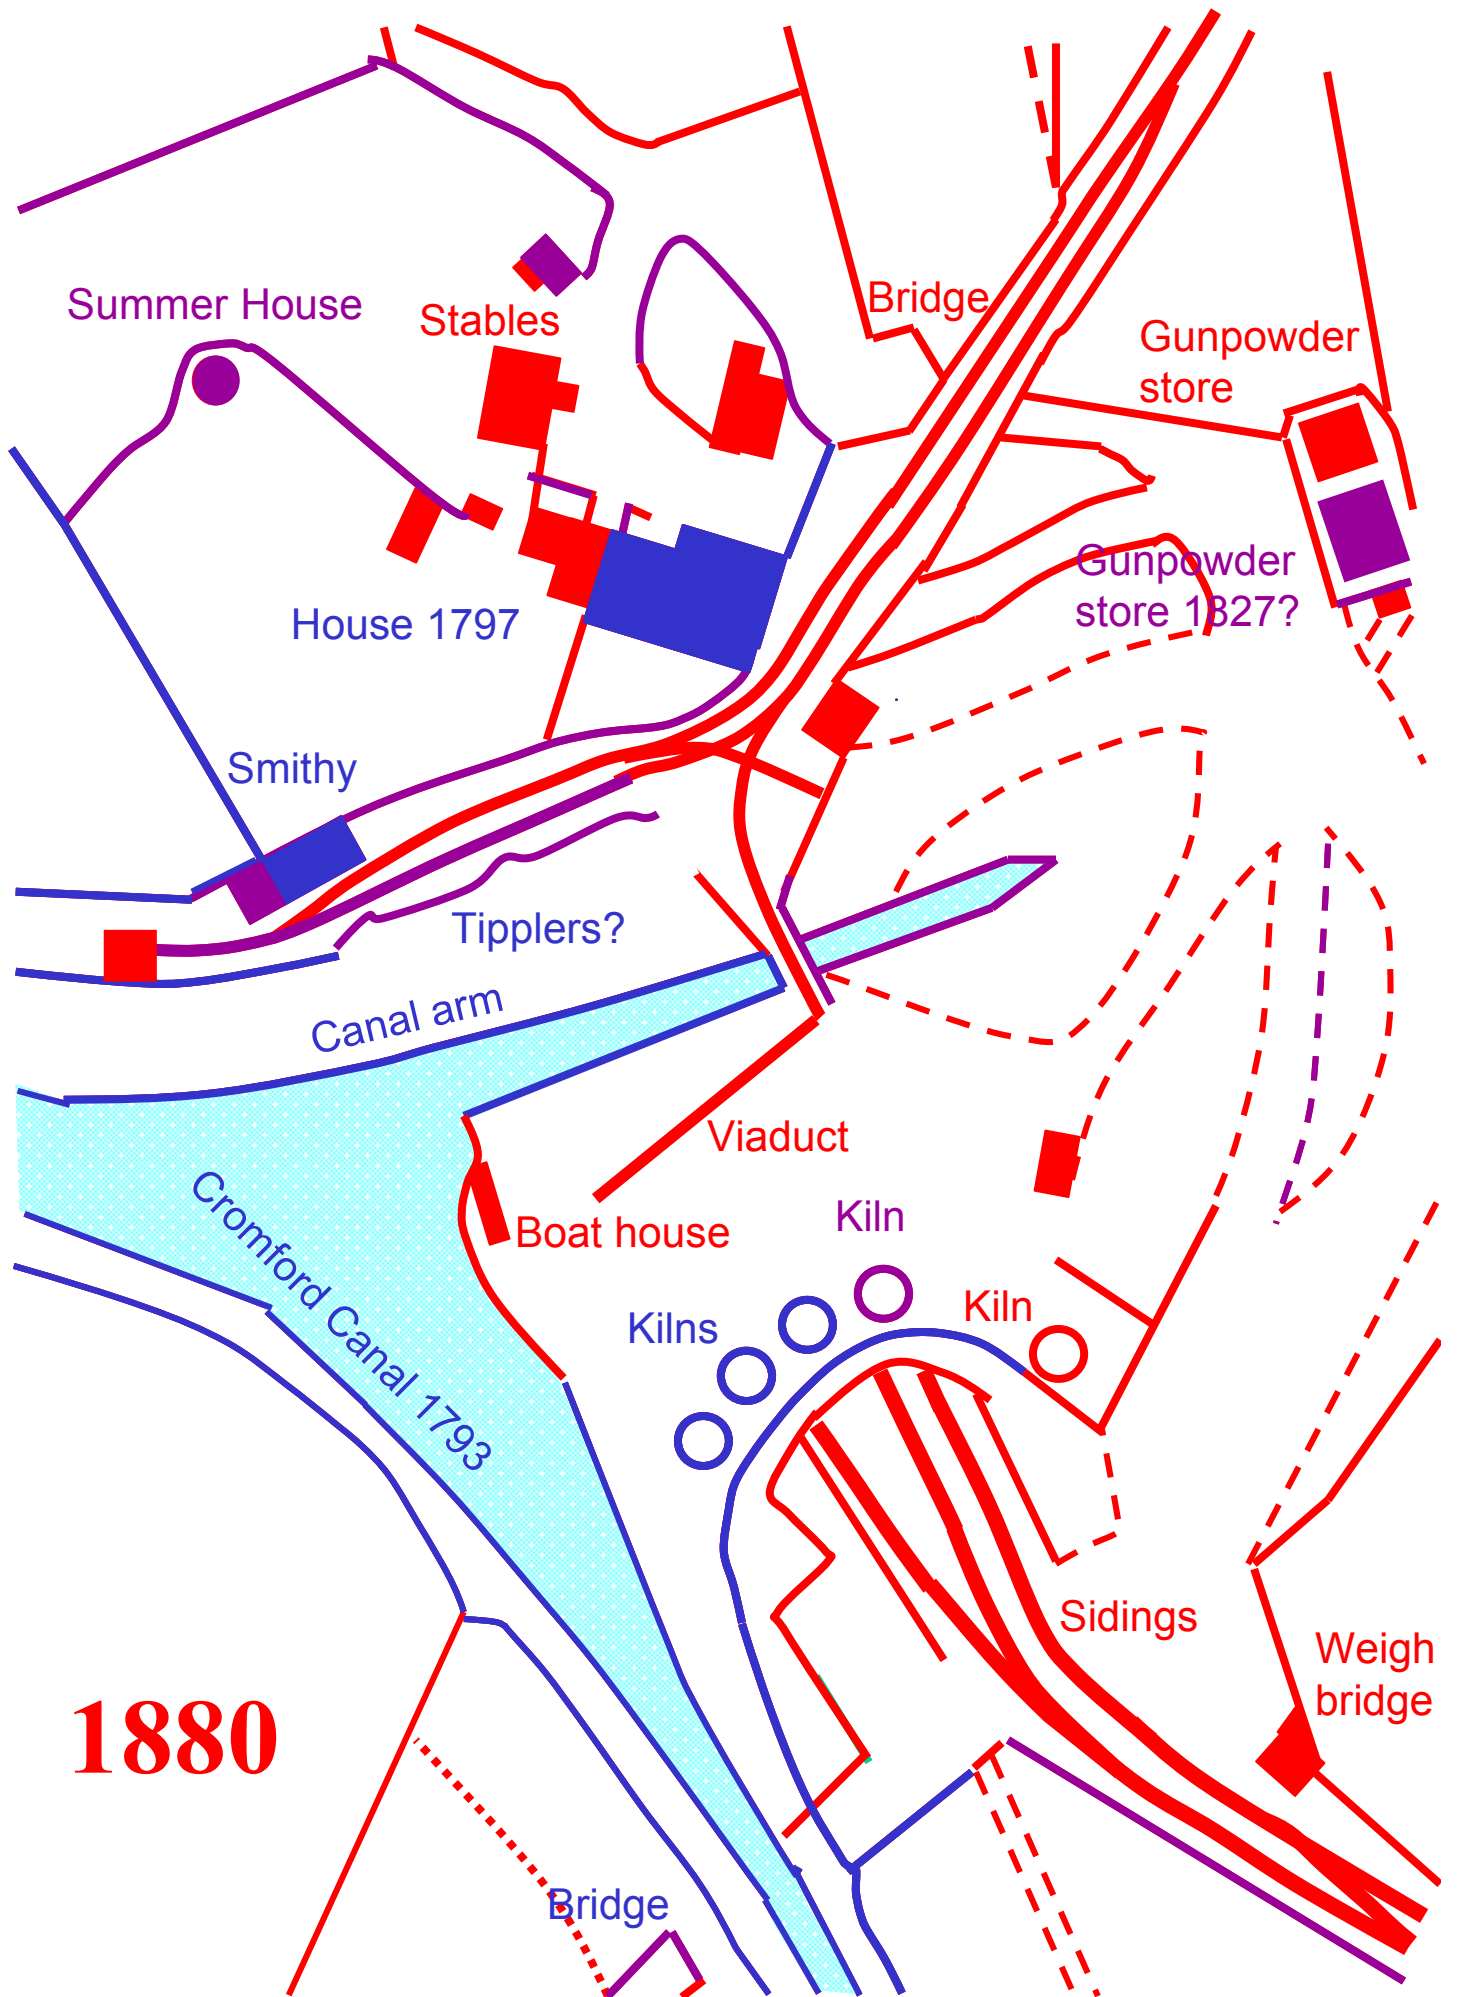

These plans are also overlaid onto the 2015 plan.
